

Welcome to Electrical Level 2 City & Guilds Diploma Electrical Installations

About this course:

This course is for anyone who wishes to start work in the electrical sector and aged 16-19 inclusive. It will give you a wider understanding of electrical installation and allow you to progress further in your studies or to go into employment as an electrical or within the wider electrical industry.

What you will learn:

You will learn about the design, construction and testing of a range of electrical circuits and systems as found in domestic, commercial and some industrial applications. The course includes practical workshop tasks that provide opportunities for students to develop hand and tool skills which meet industrially recognised levels. The course will also provide knowledge of the principles of technology that underpin the electrical industry.

Modules:

- Health and Safety in building services engineering
- Principles of Electrical Science
- Electrical Installations Technology
- Installations of wiring systems and enclosures
- Understanding how to communicate with others within building services, engineering

Next steps after this course:

After this course, you can continue to study at Keighley College and progress onto our Level 3 Diploma in Electrical Installation.

Until you arrive at college, keep checking our website, social media and Applicant Hub for updates and even some activities to do before we meet you in September.
