

# Welcome to Health and Social Care T Level Healthcare Science

## About this course:

Our exciting T Levels are a new 2-year high quality, technical qualification, developed in collaboration with employers in the sector. This is ideal for you if you would like to know more about working in the healthcare science profession, and want to develop some practical experience at the same time.

The Level 3 technical qualification will provide learners with the knowledge, skills and behaviours needed to progress into skilled employment or higher level technical training or study. The core knowledge and understanding will be assessed through an examination and core skills through a practical employer-set project.

Taught in our newly designed 21st Century learning environments, this qualification is equivalent to 3 A-Levels and provides learners with the skills, knowledge and understanding to be successful and in control of their own learning. Learners will spend 80% of your time in College and 20% (45 to 60) days on an industry placement with an employer. You will be allocated a personal tutor who will assist and support you throughout the programme.

## Modules:

- Health
- Safety and environmental regulations in the health and science sector
- Managing information and data within the health and science sector
- Good scientific and clinical practice
- Core science concepts

Until you arrive at college, keep checking our website, social media and Applicant Hub for updates and even some activities to do before we meet you in September.
