

Welcome to Fabrication and Welding City & Guilds Level 2 Technical Diploma Performing Engineering Operations

About this course:

Our courses combine essential knowledge and various workshop skills into one package, giving you a range of industry-recognised abilities. You will be assessed in the workshop and classroom, and cover aspects of the regular activities that a fabricator/welder is likely to come across on a daily basis.

Compulsory modules:

- Unit 201: Working Safely in an Engineering Environment
- Unit 202: Carrying out engineering activities efficiently and effectively
- Unit 203: Using and Communicating Technical Information

Optional modules:

- Using manual metal arc welding equipment
- Using manual TIG welding equipment
- Using semi-automatic MIG or MAG welding equipment
- Carrying out sheet-metal cutting, forming and assembly activities
- Cutting and shaping platework components

Next steps after this course:

On completion, you will be able to progress into employment or to develop further welding skills with one of our other courses.

Safety requirements:

All practical work will be undertaken in the fabrication and welding workshop, where training, guidance and supervision are provided for each activity. Students are required to wear suitable clothing and footwear at all times, as well as eye protection when necessary.

Our facilities:

Until you arrive at college, keep checking our website, social media and Applicant Hub for updates and some activities to complete before we meet you in September.
