

# Carpentry and Joinery

**Level: 2**

**Duration: 27 months**

**Carpenters and Joiners use timber products to create and install building components, working either on-site or in a workshop.**

## Apprenticeship overview

### Core skills, knowledge and behaviours you will learn

- Safe use of hand and power tools
- How to set out and mark timber joints
- How to install floor joists, partitions, and roof structures
- How to manufacture basic architectural products (doors, windows)
- How to work with other trades on-site

### In addition to the core content, you will choose one option from:

- Site Carpenter
- Architectural Joiner

### Where you might work

- Construction sites
- Joinery workshops
- Private homes
- Retail shopfitting projects

### Typical job roles

- Apprentice Carpenter
- Bench Joiner
- Site Carpenter

### Good to know

Requires high precision—measurements are often to the millimetre

Site work involves heights and all-weather conditions

Workshop work involves heavy machinery and dust management
