

Plumbing and Domestic Heating Technician

Level: 3

Duration: 54 months

These technicians plan, install, and maintain plumbing and heating systems in various buildings, ensuring they are safe and efficient.

Apprenticeship overview

Core skills, knowledge and behaviours you will learn

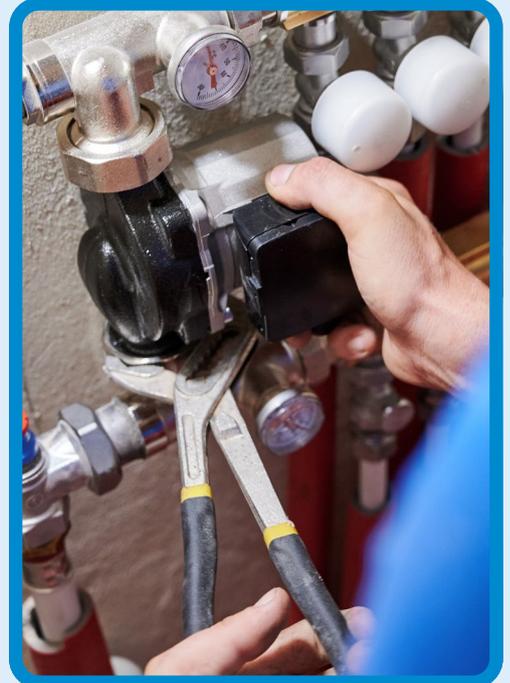

- Scientific principles of water and heat
- Pipework jointing (soldering, threading, pressing)
- How to install boilers, heat emitters, and sanitation systems
- How to commission and decommission systems
- Customer service and professional communication

Where you might work

- Domestic homes
- Hospitals and schools
- Construction sites
- Maintenance firms

Typical job roles

- Plumber
- Heating Engineer
- Gas Engineer

Good to know

This is a long-term apprenticeship (4 years) due to the high skill level

You will likely need to register on the Gas Safe Register (if choosing gas)

Work often involves tight spaces and heights
