

Engineering Manufacturing Technician Apprenticeship

Level 4

45 months

Engineering Technicians provide specialist technical support to help develop, produce, or test products and processes, ensuring they meet customer specifications for quality, cost, and delivery efficiently and effectively.

Apprenticeship overview

Engineering Manufacturing Technicians collect and analyse data to support product design, manufacturing, testing, and maintenance, ensuring quality, reliability, and cost-effectiveness. They produce technical documentation and collaborate with managers, production teams, quality engineers, customers, and regulators. Working in offices, manufacturing floors, or on-site, they balance operational and administrative tasks. Responsible for delivering products on time and within budget, they apply technical knowledge and judgment to solve complex problems and improve processes. Reporting to engineering or manufacturing managers, they ensure compliance with quality and safety standards, contributing to continuous improvement across their organisation.

Typical job roles

Costing Engineer	Manufacturing
Installation Engineer	Production Engineer
Manufacturing	Process Engineer
Procurement Engineer	Quality Engineer

Why choose an apprenticeship for your business?

The benefits, in brief:

- Retrain and upskill your current team
- Fill skill gaps and expand your workforce
