

Engineering Operative Apprenticeship

Level 2

21 months

Engineering Operatives perform essential manufacturing tasks, maintain equipment, operate machines, and follow safety and quality standards, working individually or in teams across various engineering sectors.

Apprenticeship overview

Engineering Operatives play a vital role in manufacturing and engineering sectors by performing a wide range of tasks such as machine operation, maintenance, assembly, fabrication, and technical support. They work independently or as part of a team, ensuring equipment is serviceable, carrying out quality checks, and complying with safety and environmental regulations. While job specifics vary by sector, core skills remain consistent. Operatives must follow detailed instructions and take responsibility for the accuracy and quality of their work. Roles include machine setter, fabricator, fitter, maintenance operative, and technical support operative, among others.

Typical job roles

Engineering Operative
Machine Setter/Operator
Mechanical Engineering Operative

Why choose an apprenticeship for your business?

The benefits, in brief:
